	KoKo Moe Filters					
						These filters fit KoKo Spirometer, KoKo DigiDoser, KoKo Trek Spirometer and KoKo Legend Spirometers. The patented design of the KoKo Moe filter offers low resistance, low dead space and minimal air flow turbulence for accurate spirometry or total lung analysis. Both resistance and deadspace fall within ATS guidelines. The HEPA filtration medium used in KoKo Moe filters is comprised of permanent electrets that trap viruses and bacteria to prevent contamination. The single patient use KoKo Moe filter minimizes concern regarding the spread of infectious diseases and provides improved patient comfort. At the same time, lab production increases as sterilization time decreases.
